Skills

Programming Language :

PHP, JavaScript, TypeScript, Java, C++, Dart, Python

Frontend Frameworks :

ReactJS/NextJS, VueJS, Angular, Bootstrap, JQuery, Tailwind CSS

Backend Frameworks :

NodeJS/ExpressJS/NestJS, Laravel, CodeIgniter, Django, Flutter

Collaboration Tools :

Slack, Trello, Jira, Git

Others :

Microservices, Elasticsearch, RabbitMQ, Kubernetes, Algolia, Docker, Github, GitLab, BitBucket, AWS, HTML, CSS, GraphQL

Database :

MYSQL, MongoDB, PostgreSQL, MariaDB, Oracle

Operating System :

WINDOWS, LINUX, MacOS

Languages

Arabic

Native speaker

English

French

Interests

Sports

Football, Basketball ...

🐦 @MustaphaBenkada

🌐 @mustapha-benkada-b1b961a8

Senior full-stack developer with over 10 years of experience in building scalable, high-performance applications. Passionate about problem-solving, optimizing code, and staying ahead of emerging technologies. A quick learner who thrives in dynamic environments, continuously enhancing skills to contribute to innovative and impactful projects.

Work experience

Senior Full Stack Software Engineer — Modsoft Technology AI Development Dubai, United Arab Emirates

Since May 2025

- Developed and maintained hotel booking websites with responsive and user-friendly interfaces.
- Built holiday home and vacation rental platforms, enabling users to browse properties, check availability, and make bookings.
- Implemented property listing, search, filtering, and reservation management features. Integrated payment gateways and booking systems to streamline customer reservations.
- Developed and maintained a banking application's admin dashboard, providing internal teams with tools to manage and monitor banking operations.

Senior Software Engineer — Kahunas Dubai, United Arab Emirates

From Apr. 2024 to May 2025

- Developed new features and optimized an existing PHP-based platform using Laravel and CodeIgniter, including stabilizing legacy code for better performance, security, and maintainability.
- Implemented and enhanced a subscription payment system with Stripe and PayPal, and built a real-time chat system using GetStream.io to improve user communication.
- Contributed to the platform revamp by modernizing outdated components, improving system architecture, and maintaining CodeIgniter views alongside ReactJS for an enhanced user experience.

Senior Full Stack Developer — Shooty Platform Dubai, United Arab Emirates

From Jan. 2023 to Apr. 2024

- Developed and maintained web applications using the MERN stack (MongoDB, Express.js, React, Node.js) and PHP (Laravel) with Vue.js, ensuring scalability, efficiency, and a seamless user experience.
- Designed and implemented RESTful APIs, integrated third-party services, and optimized database queries to enhance application performance.
- Collaborated with cross-functional teams to develop new features and improve overall application functionality.

Senior Full Stack Developer — Skyloov property portal Dubai, United Arab Emirates

From Sept. 2021 to Jan. 2023

- Worked extensively with the MEAN stack (MongoDB, Express.js, Angular, Node.js) to build scalable, high-performance full-stack applications.
- Built and managed backend applications with PHP (Laravel) and designed robust APIs with Node.js, ensuring scalability, high performance, and seamless data exchange.
- Developed cross-platform mobile applications using Dart (Flutter), enhancing accessibility, performance, and user experience across Android and iOS devices.
- Integrated and optimized APIs in Flutter applications, ensuring real-time data synchronization and smooth performance.

Senior Full-stack Developer — Reward Doha, Qatar

From Aug. 2019 to Sept. 2021

- Developed a restaurant loyalty program, Reward, with an intelligent and flexible rewards system to enhance user engagement.
- Built a web application using PHP (Laravel) for the backend and Vue.js with Blade templates for the frontend, along with a mobile app using Dart (Flutter) for real-time data synchronization.
- Designed and integrated RESTful APIs for seamless communication between web and mobile platforms and deployed the web application on AWS Elastic Beanstalk for scalability and high availability.

Work experience

Senior Full Stack Developer — HDConsulting Algeria

From Sept. 2017 to Aug. 2019

- Built and integrated RESTful APIs using Node.js. Created dynamic, responsive web interfaces with React.js, enhancing user interaction and front-end performance.
- Developed and maintained web and mobile applications using PHP (Laravel) for the backend and Dart (Flutter) for cross-platform mobile development.
- Led the development of a food delivery platform, ensuring high performance and a seamless user experience across web and mobile applications.
- Contributed to a delivery service project by implementing key features to enhance operational efficiency.

Full Stack Developer — Kognitif SAS France

From Jan. 2015 to Sept. 2017

- Contributed to the development of Konnexion ERP, an integrated platform for prospect management, project organization, administrative workflows, and financial operations.
- Designed and built scalable backend solutions using PHP (Laravel, CodeIgniter) and Node.js (Express.js), while optimizing frontend interfaces with React.js for a seamless user experience.
- Collaborated with cross-functional teams to implement innovative features and enhance system reliability.

Internship

Internship — Laboratory Of Paris Descartes Paris, France

From Feb. 2019 to Jun. 2019

During my final year of study, I completed a training period at the laboratory of Paris Descartes University, where I worked on my master's graduation project, "Applying SDN Concept for IoT-based 5G Networks." This experience allowed me to enhance my skills, gain valuable hands-on knowledge, and deepen my understanding of SDN and IoT-based 5G networks.

Graduation Project (Master's degree) — University Of Djillali Liabes Computer Science Department Sidi Bel Abbès, Algeria

From Feb. 2019 to July 2019

Research Project titled "Applying SDN Concept for IoT-based 5G Networks.", This research project aims to enhance processing performance and optimize large-scale data management in IoT networks by integrating Software-Defined Networking (SDN) and Network Function Virtualization (NFV) technologies.

Graduation Project (Bachelor's degree) — University Of Djillali Liabes Computer Science Department Sidi Bel Abbès, Algeria

From Feb. 2017 to Jun. 2017

Developed a handwriting recognition application designed to enable computers to receive and interpret handwritten input from sources such as paper documents and photographs.

Programming language: C++

Technology: Artificial Neural Network (OpenCV Library)

Education

Master's Degree — University Of Djillali Liabes Computer Science Department Sidi Bel Abbès, Algeria

From 2017 to 2019

Master's degree, Networks and Information Security

Bachelor's Degree — University Of Djillali Liabes Computer Science Department Sidi Bel Abbès, Algeria

From 2014 to 2017

Bachelor's degree, Mathematics And Computer Science

Computer science — ESI - National School of Computer Science Algiers

From 2013 to 2014
